

#### Mandrel with »classic« round clamping geometry

Size	XXS, XS, S, 0, 1, 2, 3, 4
Clamping range	8–100 mm

#### Advantages

- Extremely high clamping force even at the smallest clamping  $\varnothing$
- Large clamping range and vibration dampening due to vulcanized clamping elements
- Standard segmented clamping bushings and workpiece end-stops for machining to size available
- Radial clamping, no pull-back against workpiece end-stop – ideal for pick-off from the main spindle
- Clamping without draw bolt, consequently ideal for blind bores
