

STATIONARY CLAMPING DEVICES

MANOK

HAINBUCH
SPANNENDE TECHNIK

Manual actuation stationary chuck with »classic«, round clamping geometry

Size 42, 52, 65, 80, 100
Clamping range 3–100 mm

Advantages

- Easy set-up
- Sensitive manual clamping is possible
- Ideal for 5-sided machining
- Clamping is possible with workpiece end-stop or front end-stop
- Absolute versatile implementation on machining centers, measuring machines, slotters, broaching machines, drilling machines, laser marking machines etc.
- Workpiece stabilization through axial draw force applied against the workpiece end-stop

Clamping elements

Clamping head RD

Adaptations

Magnet module RD
[Adaptation for magnetic clamping]
