

CHUCKS

InoFlex VF centric clamping vise

Compensating 4-jaw clamping device for milling operations

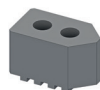

Size 160, 260
Clamping range 8–291 mm

Advantages

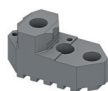

- 4-sided clamping [2x2] with compensation of the opposing jaws
- Ideal for clamping workpieces that are susceptible to deformation
- For I.D. and O.D. clamping
- High repeatability and run-out accuracy
- Large stroke and compensating stroke for each jaw
- Flat and compact size
- Easy handling
- Flexible implementation [4-jaw and 2-jaw clamping]

Clamping elements

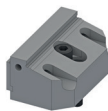

Top jaws, soft

Claw jaws, hard

Positive stop jaws, hard smooth

Moveable jaws, hard smooth

Movable jaws, hard toothed
